

**What do you
call a simple device
that can deliver
nutrition virtually
everywhere?**

“My work involving the conservation of chimpanzees and their forest habitat in Africa eventually led me to travel extensively both in the developing and industrialized worlds. There are many problems that we face today, and each solution provides another ray of hope. That is why I am so delighted that my friends at IDC have created The Answer™, a visionary product designed to be a safe, sanitary delivery system for liquid foods and beverages; one that doesn't rely on costly refrigeration and harmful preservatives, and that is environmentally sustainable and easy to use. The Answer™ has the promise to revolutionize how beverages in our world are transported and shared.”

It looks like a tap. It works like a tap. But it's so much more. It's the only solution in the world that keeps liquids shelf-stable after initial use without recourse to preservatives or refrigeration.

Don't Call It A Tap™

Nutritious beverages can now be safely dispensed in virtually every corner of the world with the push of the button.
